Office Action Summary

Art Unit: 2862

The title of the invention is not descriptive. A new title is required that is clearly indicative of the invention to which the claims are directed.

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 31-33 and 35-37 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Fisher.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 36 and 38-41 are rejected under 35 U.S.C. 103(a) as being unpatentable over Fisher.

Fisher discloses all of claimed subject matter, except for the casting composition and the specific structural details of the protective sleeve. These features are considered obvious design considerations well within the capabilities of one skilled in the art.

Claims 21-30, 42 and 43 are allowed.
